

Acoustical Enclosures

Memtech Acoustical has supplied and built many styles and types of acoustical enclosures encompassing a wide range of applications. Whether it's a NVH cell, anechoic/hemi-anechoic test chamber or noise containment enclosures, we will work with our customers from the initial noise study through the final construction. We will advise as to the many styles and options of acoustical enclosures available and make a recommendation based on the customers' need and performance goals

Metal Noise Enclosures are custom built with many different features, and are used in a wide range of applications. With our partners at George Koch Sons, we provide the highest quality and best engineered acoustical enclosures available. While providing superior sound attention, they also serve as a dust free climate controlled environment for sensitive equipment and testing operations.

Flexible Curtain Enclosures are often an effective and economic approach to noise control. These curtain enclosures are designed specifically for your need and are available with several options. Sound Seal curtains are the choice for many industrial applications and more.

ABS Noise Enclosures are custom designed, made with tough, impact resistant, ABS plastic. ABS withstands high temperatures which makes it an ideal material for machine and motor enclosures.

For additional styles of enclosures that are available, please give us a call 877.606.3940
